

PRIYANKA KULKARNI

Data Analyst | SQL · Python · Power BI · Process Automation
Pune, Maharashtra | 9067689507 | kulkarnipriyanka086@gmail.com

PROFESSIONAL SUMMARY

Data Analyst with 2.6 years of experience in Python, SQL, Power BI, and Excel, specializing in billing and revenue analytics for telecom and enterprise clients. Built two production automation tools (invoice compliance and revenue analytics) that cut manual analysis effort by 80%, improved billing accuracy by 20%, and turned hours-long investigations into minutes. Skilled at translating large, messy operational datasets into validated, decision-ready insights and interactive dashboards.

CORE SKILLS

Programming & Automation: Python, Oracle SQL, Unix Shell Scripting, Process Automation

Data Analytics & Database: Data Analysis, Data Profiling, ETL, Data Validation & Cleansing, Data Modelling, Variance Analysis, Trend Analysis

BI & Visualization: Power BI, Tableau, Microsoft Excel, Data Visualization, Dashboard Development, KPI Reporting

Core Competencies: Root Cause Analysis, Data Reconciliation, Business Intelligence, Stakeholder Management

Tools & Platforms: GitHub, BMC Remedy

PROFESSIONAL EXPERIENCE

Data Analyst

Oct 2023 – Present

Amdocs Development Center India Pvt. Ltd. — Pune, India

- Engineered Prism Invoice Compliance Analyzer, a Python-based automation tool for PDF invoice data extraction, validation, and business-rule compliance, cutting manual invoice validation effort by 80% and reducing document review time from hours to minutes.
- Developed Pulse, a Python-based revenue analytics solution automating trend analysis, variance detection, and anomaly identification, reducing manual revenue analysis effort by 80% and accelerating operational insight delivery.
- Performed SQL-based data profiling, variance analysis, and reconciliation across large-scale billing datasets, uncovering revenue-impacting discrepancies and improving billing accuracy by 20%.
- Analyzed revenue trends and operational variances to generate actionable business insights, cutting investigation time from hours to minutes and accelerating root-cause analysis for critical billing issues.
- Designed interactive Power BI dashboards tracking 8–10 key billing KPIs, reducing manual reporting effort by 50% and enabling real-time, data-driven decision-making for stakeholders.

PROJECTS

Prism Invoice Compliance Analyzer

Python | PDF Processing | Data Validation | Process Automation

- Designed a modular Python solution to extract, validate, and reconcile invoice data from PDF documents using configurable business-rule validation and compliance checks.
- Implemented a scalable subprocess-based execution architecture with centralized status tracking, enabling independent document processing and integration with Sentinel Ops Hub.

Pulse Revenue Analytics

Python | SQL | Data Analysis | Trend Analysis | Variance Analysis

- Built a modular analytics engine to evaluate revenue trends, perform variance analysis, and detect operational anomalies using configurable analytical rules across reporting periods.
- Engineered an automated insight-generation workflow transforming raw operational data into actionable business intelligence through centralized reporting and real-time analytical execution.

EDUCATION

Master of Computer Applications (MCA)

Jun 2023 – May 2025

Savitribai Phule Pune University — Pune

Bachelor of Science in Computer Science

Jun 2020 – May 2023

Indira College of Commerce and Science — Pune
